

HDS: Warranty Table

HDS: Warranty Table

In accordance with French regulations regarding health data hosting, our HDS (Health Data Hosting) services are managed through a dedicated commercial process independent of our other Trustteam Group services. This specific framework is designed to ensure they meet the strict requirements of HDS certification, issued by the Digital Health Agency (ANS), in accordance with the French Public Health Code .

Within our HDS-certified offering, no personal health data is transferred to a country outside the European Economic Area unless the data controller has given explicit prior consent. In practice, health data is hosted exclusively in our data centers in Europe, ensuring its storage within the country in accordance with legal requirements.

Company name of the party	Role in the hosting service (Host/Host subcontractor)	HDS certified (yes / no / exempt)	Qualified SecNumCloud 3.2	Accommodation activities in which the Processor intervenes	Access to personal health data from countries outside the European Economic Area, by the hosting service provider or one of its subcontractors (requirement no. 29 of the HDS standard)	Hosting service provider or subcontractor subject to a risk of access to personal health data from countries outside the European Economic Area, imposed by the law of a third country contrary to Union law (requirement No. 30 of the HDS standard)
